

KEY MANAGEMENT SOLUTIONS FOR HEALTHCARE

HOSPITALS | CARE HOMES | HEALTH CENTRES

INTRODUCING SENTRIGUARD®

Enhance key management without breaking the bank

In sectors like healthcare, where time may be a critical factor, the effective management of the hospital estate forms a crucial role in enabling the provision of successful service delivery to patients and staff alike.

Within the healthcare environment, every decision related to the effective management of the site, including keyholding, needs to comply with strict regulations to help mitigate risks and ensure the duty of care for all parties: patients, visitors, staff and contractors.

At the same time, prompt, secure and auditable access to buildings, departments, vital equipment and pharmacies, is absolutely essential. Any delays in access, or loss of keys / access cards, may have serious implications on the effective delivery of services to patients and staff than in similar sectors.

SentriGuard, a smart key management solution, can help with enhancing access while offering the required security levels and ease of use for all parties involved.

KEYS AT THE POINT OF NEED FOR:

**MEDICAL & ADMIN
STAFF ACCESS**

**CLEANING & OTHER
FM PROVISION**

**ESTATE & BUILDING
MAINTENANCE**

**ACCESS TO SECURED
AREAS & STORAGE**

PROVEN BENEFITS

Reasons to implement SentriGuard®

A cost-effective solution

A secure alternative to digital access control. It does not require lock changes, key replacements or hard wiring.

Security & compliance

Designed with security in mind, certified and attack-tested by the industry experts to ensure compliance and mitigate risks.

Access monitoring & audit reports

Generate detailed access reports to know who and when accessed keys, and get notified when keys are not returned to a key safe.

Save time

No need to search for keys or collect them from a central location. Keys are always available for immediate access by approved individuals.

Multisite controls

Centralised control of access to all areas and buildings with key safes that are managed from a single platform.

Eradicate key loss & lock replacements

With keys frequently changing hands, the risks of losing them are much greater. Keys stored with SentriGuard are unlikely to be misplaced or carried away, reducing chances of lost keys and consequential lock replacements.

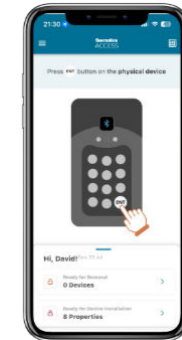

THE SOLUTION

An innovative approach to keyholding in estate management

SentriGuard is a unique solution that combines the best of physical security with the latest technology and innovation in keyholding methods.

This smart key management system has been designed with your needs in mind and consists three elements for the most secure yet quick access:

SentriGuard® **KEY SAFE**

Unrivalled security rating

Safeguarding and compliance are a must! Flip to the next page to learn more about SentriGuard's security.

Bluetooth connection

The app connects to key safes via Bluetooth, so you can have access even when there is no mobile signal.

Key detection feature

Receive an email or SMS notification when keys are not returned to a key safe. You can then track the last key safe user on the platform.

Access+ **PLATFORM**

Manage key safes & users

Manage all key safes on one platform. Add and remove users, allowing a specific level of access to each one.

Grant & revoke access remotely

Allow access to specific key safes with a few clicks of a mouse! Access can be removed immediately, if required.

Create bespoke reports

Run various reports: access (including time, date and duration), missing keys, code generation, key safe alerts, usage reports and more.

Access+ **APP**

Access keys

A user-friendly mobile app for key access by allocated individuals.

Data upload in real time

Full onsite data capture: use the app to upload images and status notes to be viewed on the platform.

Key safe location map

In-built map shows locations of all of your key safes. Alternatively, a list view is available for a quick address and key safe status check.

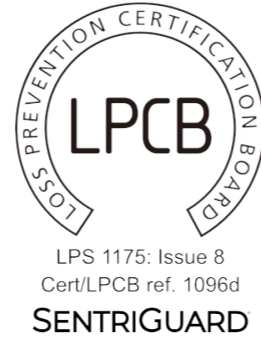

SECURITY FIRST

The most secure key safes on the UK market

SentriGuard key safes are **commercially graded**. They have achieved the LPS1175 C1 and C3 Loss Prevention Standard certification, which evaluates **resistance to unauthorised access** through design evaluation and severe attack testing performed by professionals.

Furthermore, Keynetics key safes undergo continuous product development and testing to ensure that it remains the most secure solution on the market.

KEY SAFE INSTALLATION

We offer a completely transparent and affordable installation service. One of our Engineers will visit your site, discuss the exact key safe location, and complete the installation swiftly and neatly, with no disruption to your day-to-day activities.

WE'RE HERE TO SUPPORT YOU

From the initial enquiry to ongoing support

The Keynetics team is here to support you throughout your keyholding journey:

- **Planning:** We will assist you in project management, timescales and advise you on the system set up.
- **Implementation:** We will guide you through the process, install key safes, and help you with setting up your platform account.
- **Training:** Full platform and app training is available for you in a form of text guides and video tutorials.
- **Customer support and troubleshooting:** We provide ongoing technical support for your peace of mind.
