FACILITIES MANAGEMENT

QUICK AND SECURE ACCESS TO PREMISES
WITH
SENTRIGUARD®

SENTRIGUARD[®] FOR FACILITIES MANAGEMENT

Quick and secure access for staff and contractors

SentriGuard is a unique key management solution that allows you to ensure allocated individuals can access keys efficiently by storing them at the point of need.

Reliable and secure, it is trusted by top facilities management companies across the UK and Europe.

QUICK CONTRACTOR ACCESS

No need for contractors to collect keys from a central location or wait for site access. The app allows visit notes and photos to be uploaded and used as proof of service delivery.

NO MORE MISSING KEYS

Avoid unnecessary key and lock replacement charges. Keys never leave the property, and the key detection feature will notify you if keys are not returned.

COMPLETE ACCESS CONTROL

Grant and revoke access remotely and view the access audit trail on the platform. Run a variety of reports or see device alerts in a few clicks.

AVOID MISSED VISIT CHARGES

With keys always at the point of need for approved contractors, missed visit charges due to access issues can be eradicated.
